

## **Northern Ireland Cancer Patient Experience Programme**

**2015 Survey**

**Southern  
Health & Social Care Trust**

**Published October 2015**

The Northern Ireland Cancer Patient Experience Survey Programme is undertaken by Quality Health on behalf of the Northern Ireland Public Health Agency and Macmillan Cancer Support

## **Introduction**

The Northern Ireland Cancer Patient Experience Survey 2015 (CPES) follows on from the successful implementation of the 2010, 2012, 2013 and 2014 surveys in England and in Wales, (4 iterations in England and 1 in Wales) designed to monitor progress on cancer care. The 2015 survey is congruent with defining quality as those indicators of safety, effectiveness and patient experience that indicate that standards are being maintained or improved. The CPES provides information that can be used to drive local quality improvements, both by Trusts and Commissioners, and is consistent with the objectives of Health Service policy.

## **Participating Trusts**

5 hospital Trusts providing cancer services took part in the survey, accounting for every Trust that provides adult cancer care in Northern Ireland.

## **Patients selected to take part**

The survey included all adult patients (aged 16 and over) with a primary diagnosis of cancer who had been admitted to a Northern Ireland hospital as an inpatient or as a day case patient, and had been discharged between December 2013 and May 2014.

Patients eligible for the survey were taken from Trust patient administration systems; the inclusion criteria were that the patient had an International Classification of Disease (ICD10) code of C00-99 (excluding C44 and C84) or D05. As in the England and Wales surveys, the types of cancer patients included all those with rarer cancers as well as patients in the “Big 4” cancer groups – i.e. breast, prostate, lung, and colorectal/Lower GI.

Trust samples were checked rigorously for duplicates and patient lists were also de-duplicated at Northern Ireland level to ensure that patients did not receive multiple copies of the questionnaire.

Deceased checks on Trust samples were carried out on at least three occasions during the fieldwork, to ensure that the numbers of deceased patients in samples was reduced to an absolute minimum. This process was undertaken by the Northern Ireland Cancer Registry.

## **Survey method**

Postal surveys were sent to patients' home addresses following their discharge. Up to two reminders were sent to non-responders. A freepost envelope was included for their replies. Patients could call a free telephone line to ask questions, complete the questionnaire verbally, or to access an interpreting service. Survey packages were prepared by Quality Health, supplied to the Northern Ireland Health Service and dispatched to patients by them.

## **Response rate**

A total of 5,388 patients who had received treatment for cancer during December 2013 to May 2014 were included in the sample for the Cancer Patient Experience Survey. These patients were allocated to 13 different cancer groups.

877 eligible patients from this Trust were sent a survey, and 451 questionnaires were returned completed. This represents a response rate of 53% once deceased patients and questionnaires returned undelivered had been accounted for. The response rate for Northern Ireland as a whole was 62% (3,217 respondents).

## **Percentage scores**

The questions in the cancer survey have been summarised as the percentage of patients who reported a positive experience. For example, the percentage of patients who were given a complete explanation of their diagnostic tests or the percentage of patients who said that nurses did NOT talk in front of them as if they were not there. Neutral responses, such as "Don't know" and "I did not need an explanation" are not included in the denominator when computing the score.

The higher the score the better the Trust's performance. Some scores represent performance across a pathway involving primary and community care in addition to acute care but represent important parts of the patient experience along the pathway of care.

Most of the questions in the 2015 Cancer Patient Experience Survey for Northern Ireland are in the same format and have the same wording as in the 2014 CPES for England, and the scoring system for them is identical, thus enabling robust comparisons to be made.

## **Low numbers of respondents and data not reported**

Some Trusts have relatively small numbers of cancer patients, so the total number of respondents to the survey may be lower despite the high response rate. Reports for these Trusts have been completed in the normal way, but the results for these Trusts need to be treated with caution. It is important to recognise however, that the low numbers of respondents in these Trusts for some tumour groups is simply the result of low numbers of cancer patients being treated, especially where there is low incidence of particular types of tumours.

**Northern Ireland Cancer Patient Experience Survey 2015**  
**Southern Health & Social Care Trust**

Patients were asked to complete the questionnaire in respect of the Trust named on the covering letter. In those Trusts without a radiotherapy unit, where patients reported receiving these treatments despite these instructions, responses have been suppressed.

In almost all Trusts, there were tumour groups where the number of respondents was less than 20; this is particularly true of tumour groups representing rarer cancers. Where numbers of respondents in a particular tumour group is less than 20, we have suppressed this data. This is further explained in the introduction to the tumour group tables in this report.

**Benchmark charts**

Percentage scores are displayed on benchmark bar charts in the following section. For each question, a bar is displayed showing the "all cancers" score for each Trust in Northern Ireland, together with the "all cancers" score for Northern Ireland as a whole, for the Wales 2013 CPES survey, and the England 2014 CPES survey. <sup>φ</sup>

Where the variation between the Trust score and the score for Northern Ireland has been found to be statistically significant the relevant Trust bar is highlighted with an asterisk (\*) coloured green where the variation is positive and red where the variation is negative.

In the chart above Belfast has a statistically significantly lower score (77%) than Northern Ireland (80%), while South Eastern (85%) and Western (86%) have a statistically significantly higher score in each case.

The table below each benchmarking chart shows the following:

- **Column 1** shows the Trust score for that question in 2015;
- **Column 2** shows the lower confidence interval at 95% for the 2015 data;
- **Column 3** shows the upper confidence interval at 95% for the 2015 data;
- **Column 4** shows the highest Trusts' score for that question in 2015;
- **Column 5** shows the number of respondents who answered the question at this Trust in 2015.

Following these tables is further information which show the scores for each question for each of the 13 tumour groups at this Trust, with a comparative score for that tumour group for all Trusts in Northern Ireland.

<sup>φ</sup> Further information on the Wales and England surveys can be found at [www.quality-health.co.uk](http://www.quality-health.co.uk)

### **Further information**

Full details of the survey method are in the Report of the Northern Ireland Cancer Patient Experience Survey 2015, which will be available at [www.quality-health.co.uk](http://www.quality-health.co.uk) from October 2015; further details of survey development, nationally agreed methodology, and cognitive testing are also available at [www.quality-health.co.uk](http://www.quality-health.co.uk).

Copies of the questionnaire and covering letters can also be viewed at [www.quality-health.co.uk](http://www.quality-health.co.uk).

## Who responded to the survey at this Trust?

451 patients responded to the survey from the Trust. The tables below show the numbers of patients from each tumour group and the age and sex distribution of these patients.

### Respondents by tumour group

Tumour Group	Number of respondents*	%
Breast	114	25%
Colorectal / Lower Gastrointestinal	70	16%
Lung	14	3%
Prostate	20	4%
Brain / Central Nervous System	1	0%
Gynaecological	14	3%
Haematological	86	19%
Head and Neck	11	2%
Sarcoma	1	0%
Skin	17	4%
Upper Gastrointestinal	16	4%
Urological	77	17%
Other	10	2%

\* These figures will not match the numerator for all questions in the 'comparisons by tumour group' section of this report because not all questions were answered by all responders.

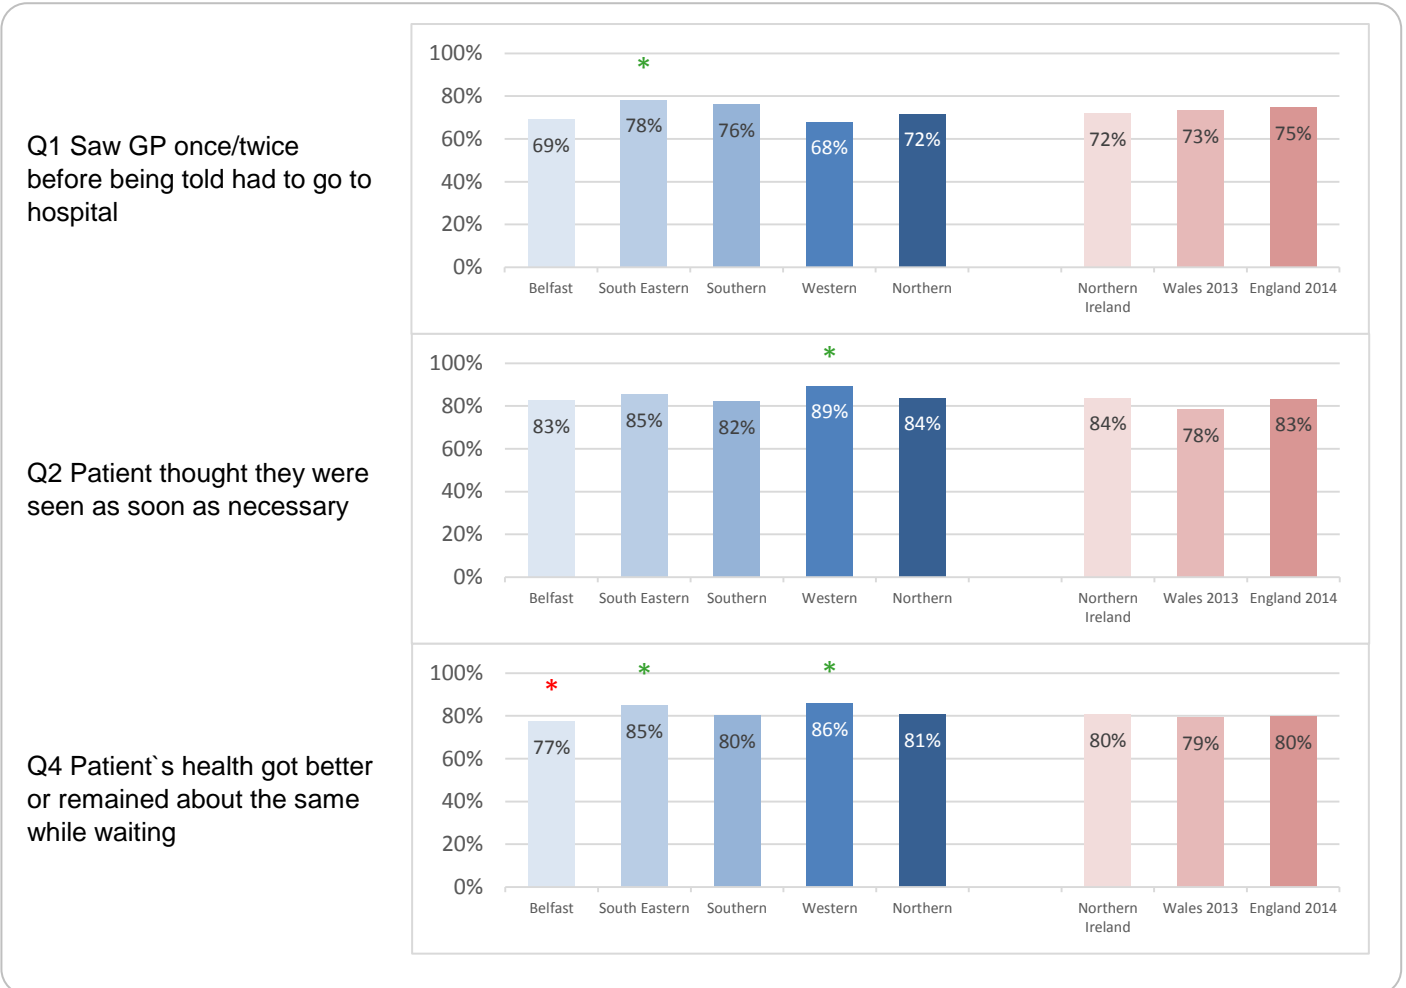

### Age and sex

The survey asked respondents to give their year of birth. This information has been amalgamated into 6 age bands. The age and gender distribution of respondents for the Trust was as follows:

	16-25		26-35		36-50		51-65		66-75		76+		Missing	Total	% Total
Men	0	0%	3	2%	13	7%	61	33%	60	33%	46	25%	6	189	<b>42%</b>
Women	1	0%	5	2%	44	19%	88	38%	56	24%	36	16%	5	235	<b>52%</b>
Missing	0	0%	0	0%	0	0%	2	33%	3	50%	1	17%	21	27	<b>6%</b>
Total	1	0%	8	2%	57	14%	151	36%	119	28%	83	20%	32	451

The Northern Ireland Cancer Patient Experience Survey was undertaken by Quality Health, which specialises in measuring patients' experiences of hospital, primary care and mental health services, using this information to improve the quality of health care and the responsiveness of health services to patients and service users' needs.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, all Health Boards in Scotland, Wales and Northern Ireland using rigorous survey methods to evaluate the quality of services to patients, the outcomes of operative procedures and health gain, and establish the views of NHS staff. Quality Health also works for international healthcare Providers on 5 continents.

Quality Health is an approved contractor for the Care Quality Commission survey programmes of patients and staff in the NHS and also undertakes data collection and survey systems for the National Patient Reported Outcomes programme on behalf of NHS England. Quality Health has headquarters in North Derbyshire.

Further information on the Cancer Patient Experience Survey programmes and the 2015 survey can be obtained at [www.quality-health.co.uk](http://www.quality-health.co.uk)
